(54) Title: A METHOD OF PRESENTING A PLURALITY OF ITEMS

(57) Abstract: The method of the invention enables a user to select an item, associates the item with at least a parameter indicating the geographical area where the item was selected, and presents a collection of items including the item dependent on whether a relation exists between the parameter indicating the geographical area where the item was selected and a parameter indicating the geographical area where the item is being presented. The computer program of the invention enables a programmable device to carry out the method of the invention. The electronic device of the invention is capable of carrying out the method of the invention.
